

For Better Innovation

FBI[®] Science GmbH

THINKING BIG: INNOVATIVE IT SOLUTIONS FOR YOUR SUCCESS

FBI Science GmbH – The Idea

With its own experience in research, the company has set itself the goal of maximizing the efficiency of research work. A special feature is the software developed for this purpose. The modular structure of FBI Science's programs allows functionalities to be customized according to the customer's needs. The special capability of the software results in savings of research time through automatic data processing and reduction of required animal experiments by means of supporting databases. Modern organization of resources and material compiles data and analysis as you need it. Multilingualism, communication management and cloud computing support the collaboration of international teams. Essential elements are maintained that are not self-evident even today - 24/7 support and customer satisfaction as the highest priority.

FBI Science offers you field-proven products for research

For your successful research, you need precise measuring and analysis instruments that quickly and reliably deliver data with which you can obtain the information you need for scientific evaluation. The FBI Science product range is designed for exactly this purpose.

With the configurable complete solutions of FBI Science you create a flexible basis for the economic management of your projects, effective process flows, continuous transparency on all levels and realization of special studies. In this way, you overcome the limitations of conventional organization in favor of a cost-conscious, future-oriented solution and ensure that your project proceeds to your complete satisfaction.

About us

Dr. Frank Buschmann has had core competencies in animal behavior research since 1992, during which time he gained the insights implemented in the company today and combined them with his nearly 40 years of experience in software and hardware development. This allows the company to offer a wide range of state-of-the-art products and services. These offerings are supported by highly available data clusters and backup systems to ensure the best availability for all customers. The concepts developed in the company have been tested at universities and clinics throughout Europe.

Produktionsstraße AniLoc®

FBI Science provides complete integrated IT solutions for pharmaceutical companies, universities, hospitals, research institutions, government agencies, and sports and livestock breeders.

FBI Science's innovative solutions:

- take over existing data sets without any problems
- are clear and easy to use
- can be adapted to individual requirements at any time
- are suitable for small facilities as well as for complex plants
- reduce working times and costs
- have been tested and proven in various research facilities

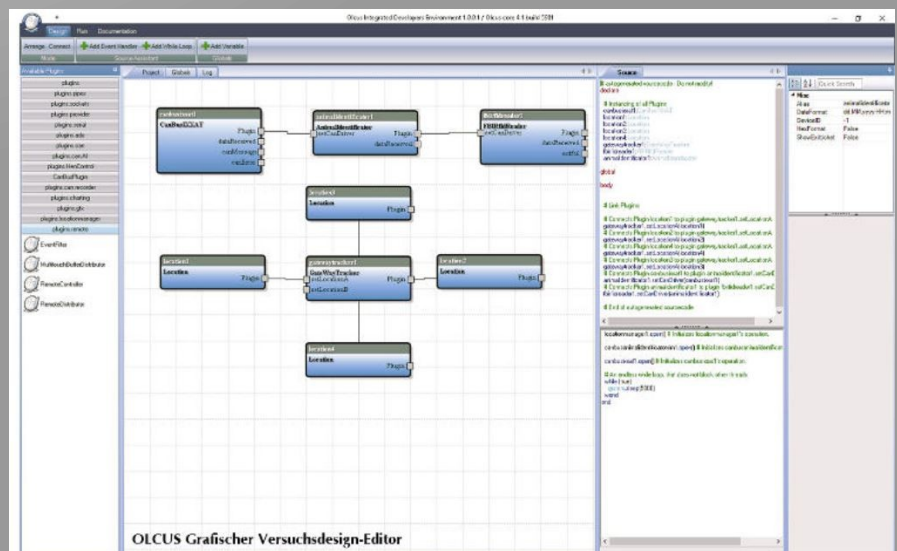

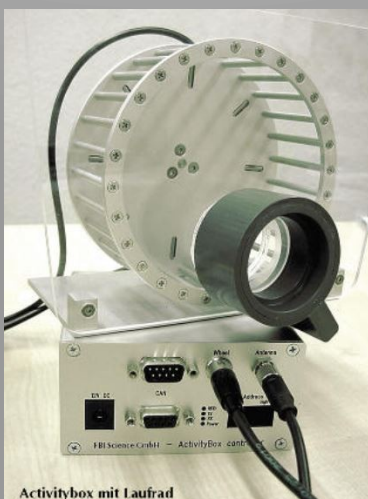

COMPETENCE AND EMPATHY

"Our goal: to find the best solution for our customers' needs" ...

" custom-made and efficient" ...

... "To ensure that your project proceeds as desired, intensive consulting by experienced personnel is recommended. We offer services customized to individual requirements - from experimental consulting and the development of complex experimental apparatus to staff training..." Dr. Frank Buschmann
